  Each REDC plan must demonstrate a minimum investment ratio of 5 to 1 of private sector to public sector investment across the plan. The private sector investments, if clearly linked to the regional priorities, can take many forms, including, but not limited to, investments in the purchase or lease of land, buildings or equipment; the construction of new or upgraded buildings or capital equipment; funds expended on training, apprenticeship or mentorship programs; in some instances, the salaries for new employees; investment in venture capital funds; upgrading of key infrastructure; or similar expenditures. Other types of private sector investment will be considered on a case-by-case basis.

  It is recognized that not every project will demonstrate a 5 to 1 investment ratio. For example, workforce development and certain infrastructure projects may provide a greater public investment. However, projects with outside investment must have a close relationship to the region's priorities. Regions should identify projects expected to substantially exceed the 5 to 1 leverage ratio and describe how their strategies will lead to a plan that in aggregate and over time, meets or exceeds the 5 to 1 ratio.
